### BASIC ANIMAL INFORMATION

Please list animals from your household that you feel should be re-homed together. Except in rare cases of trios, only pairs are considered for a bonded status.

	Name	Microchip #	Animal Type <i>C, D, R</i>	Age	Sex <i>(M / F / NM / SF)</i>	Relationships*
1						
2						
3						

\*Please indicate the animal's relationships to one another, ex. sibling to [name], parent to [name], or unrelated companion.

You have indicated these animals be re-homed together, as a pair? Please explain why.

For how long have these animals lived together?

Please describe which of the following describe the relationship between these animals (*check all that apply*):

- |   |   |  |
|---|---|--|
| <input type="checkbox"/> Adored each other  | <input type="checkbox"/> One learns from the other          | <input type="checkbox"/> One does not share well   |
| <input type="checkbox"/> Eat together   | <input type="checkbox"/> Played together                    | <input type="checkbox"/> Avoided each other  |
| <input type="checkbox"/> Slept next to each other   | <input type="checkbox"/> Will not eat if apart              | <input type="checkbox"/> Ignored each other  |
| <input type="checkbox"/> Groomed each other   | <input type="checkbox"/> Always share toys/food etc. nicely | <input type="checkbox"/> Will fight without injuries   |
| <input type="checkbox"/> Can't live without each other  | <input type="checkbox"/> Head-butt/rub each other (feline)  | <input type="checkbox"/> Have fought with injuries   |
| <input type="checkbox"/> One gives the other more confidence  | <input type="checkbox"/> Peacefully co-existed              | <input type="checkbox"/> One limits other's access to resources                              |
| <input type="checkbox"/> One teaches the other new things   | <input type="checkbox"/> Plays chase games                  | <input type="checkbox"/> Owner unable to describe detail of pet's relationship to each other |
| <input type="checkbox"/> One will only meet new people / things if the other lets them know it's okay | <input type="checkbox"/> One always chases the other        |  |
| <input type="checkbox"/> Other:   |   |  |

Have these animals interacted with other animals?

☐ Yes ☐ No

If yes, have you seen similar behaviors (as those noted above) occur with other animals, please explain:

Have the animals ever been apart (*e.g. boarding, at vet, etc*)?

☐ Yes ☐ No

If yes, for how long?

If yes, please describe what you have observed when these animals were apart (*check all that apply*):

- |  |   |   |
|--|---|---|
| <input type="checkbox"/> One looks for the other one / searches  | <input type="checkbox"/> Seems depressed                        | <input type="checkbox"/> Acts unusually only briefly      |
| <input type="checkbox"/> Will not eat unless the other is around | <input type="checkbox"/> Paces                                  | <input type="checkbox"/> Acts normally                    |
| <input type="checkbox"/> Seems nervous, unsettled                | <input type="checkbox"/> Lack of normal interaction with others | <input type="checkbox"/> No noticeable changes when apart |
| <input type="checkbox"/> Other:                                  |   |   |

Is there anything else we should know about the relationship between these animals?
